PIVOT BIO

THE FOUNDATIONAL SOURCE OF EVERY FARMER'S NITROGEN PROGRAM

Purpose-Built Microbial Technology that Delivers Nitrogen More Efficiently, Maximizes Performance and Builds a **More Resilient** System.

WEATHERPROOF NITROGEN

Applying Nitrogen On-Seed That Adheres & Colonizes the Roots as They Grow, Eliminates Rainfall Related Risks

- Reduces Nitrogen Loss & Leaching Risk
- Less Dependent on Rainfall & Timing
- Keeps Nitrogen Available During Key Growth Stages

THE FOUNDATION OF A MORE EFFICIENT NITROGEN SYSTEM

The Only Gene-Edited Microbes that Continue to Provide Nitrogen Even When Other Nitrogen Sources Are Present

- Improves the Nitrogen Use Efficiency of **ALL Your Sources of Nitrogen**
- Enhances Your Entire Nutrition Program

DAILY, IN-SEASON NITROGEN DELIVERY

Spoon-Fed Nitrogen, At the Roots, Every Day, Where and When the Crop Needs It Most

- Continuous, Nitrogen Source
- Reduces Dependency on Perfect Timing
- Improves Consistency Under Variable Conditions
- Builds a More Resilient Nitrogen Program

The performance results shown here may vary with various growing conditions, climate, and other factors. Please consult your local agronomist for more information. *Offer ends 12/31/2027. See website for details.

BUILD THE ROOT SYSTEM EARLY. FUEL PEAK NUTRIENT DEMAND.

Introducing Pivot Bio PROVEN® G3+ Two powerful technologies coming together for one shared purpose — to maximize nutrient efficiency and yield potential. PROVEN G3+ combines the early-season foundation of NUCORE+™ with the nitrogen delivery of Pivot Bio PROVEN® G3. This powerful pairing ensures your crop gets exactly what it needs, precisely when and where it needs it.

Available across OS, LIF and DRY application methods.

EARLY SEASON

ESTABLISH & ACCESS

NUCORE+

BUILDS THE ROOT SYSTEM

NuCore+ improves root growth and nutrient availability when it matters most.

NUCORE+ COMPONENTS

Enzymes
Zinc (4.0%)
Iron (0.7%)
Manganese (0.9%)
Graphite + Talc

IN-SEASON

SUPPLY & SUSTAIN

PROVEN G3+

PRECISE NITROGEN THAT STAYS WITH YOUR CROP

PROVEN G3 technology provides nitrogen near the root zone, when the crop needs it most.

CARBON SOURCE

BREAKDOWN (starches, proteins, lipids)

More carbon available
→ More microbial activity

N P K Zn

MORE NUTRIENT AVAILABILITY
IN THE ROOT ZONE

Enzymes help stimulate microbial activity and improve nutrient availability around the seed.

NITROGEN RELEASED WHERE ROOTS GROW

N supply when and where it's needed.

penergetic b WV WILDLIFE DETERRENT

- **NON-TOXIC / ODORLESS** for humans & animals
- **PROTECT** from wildlife browsing
- **DEFEND** crops without fencing
- **EFFECTIVE** after precipitation

PRODUCT INFORMATION:

Penergetic b WV effectively prevents wildlife from causing major damage to crops. It is an alternative means of reducing the economic disruption that wild boar and deer can cause to agriculture and offers a promising new approach to wildlife management.

READY TO PERFORM

Advanced trait technology for exceptional weed and above-ground pest control.

Product overview

- Exceptional broad-spectrum protection against above-ground pests
- Stacked with the Enlist® corn trait for multiple sites of action against tough weeds

Benefits

- Insect control against black cutworm, fall armyworm, European and southwestern corn borers
- Provides an additional mode of action (MOA) for European corn borer over VT Double PRO and Trecepta corn
- Enlist® weed control system provides a whole farm, neighbor-friendly solution across corn, soybean and cotton acres

Refuge requirements

POWERCORE ENLIST TRAIT

- **Corn Region:** 5% separate, structured refuge
- **Cotton Region:** 20% separate, structured refuge

POWERCORE® ENLIST® REFUGE ADVANCED® TRAIT

- **Corn Region:** 5% integrated refuge included in the bag
- **Cotton Region:** 20% additional separate, structured refuge

How does PowerCore® Enlist® trait technology stack up?

	PowerCore® Enlist® corn	VT Double PRO corn	Trecepta
Herbicide tolerance	Glyphosate (NK603)	Glyphosate (NK603)	Glyphosate (NK603)
	Glufosinate (pat)		
	Enlist 2,4-D (DAS40278)		
	FOPs (DAS40278)

WHAT ARE HIGH OLEIC SOYBEANS?

SOYLEIC HIGH OLEIC SOYBEANS ARE A SPECIALIZED VARIETY OF SOYBEANS BRED TO NATURALLY PRODUCE A HIGHER LEVEL OF OLEIC ACID. UNLIKE CONVENTIONAL SOYBEANS WHICH HAVE MORE LINOLEIC ACID (A LESS STABLE FAT), SOYLEIC HIGH OLEIC SOYBEANS OFFER A BETTER FAT PROFILE FOR BOTH ANIMAL NUTRITION AND FOOD-GRADE APPLICATIONS.

THE PURPOSE OF SOYLEIC HIGH OLEIC SOYBEANS IS TO PROVIDE A HEALTHY FAT THAT SUPPORTS ANIMAL HEALTH AND FEED EFFICIENCY. IT ALSO MEETS THE GROWING DEMAND FOR HIGH QUALITY, HIGH-OLEIC OIL IN FOOD AND INDUSTRIAL MARKETS.

Key Characteristics

- High Oleic Acid
- Typically 70-85% oleic oil (Versus 20-30% in conventional soybeans)
- More Stable
- Resists oxidation, giving better shelf life and feed stability.

Why it Matters?

- Supports Dairy & Livestock Health
- Gives Farmers opportunity for a premium

BIOLOGY IS FERTILITY™

PRODUCT		AVERAGE USE RATE	PACKAGE
 	EXCAVATOR® powered by MICROBILIZE™ EXCAVATOR is specifically designed to break down crop residue in the field, improving planter performance and releasing valuable nutrients to feed the crop. EXCAVATOR is powered by MICROBILIZE Technology, Meristem's innovative, patent-pending biological delivery system designed to safeguard the vigor and vitality of your microbes.	12.8 oz/acre	Tote 2x2.5 gal
  	REVLINE® HOPPER THROTTLE™ For Corn and Soybeans Powered by BIO-CAPSULE TECHNOLOGY™, REVLINE HOPPER THROTTLE is a patented seed lubricity packaging system with an 80/20 talc/graphite blend that safeguards the vigor and vitality of microbes all the way to the furrow while ensuring peak planter performance. REVLINE HOPPER THROTTLE CORN (RHTC) includes 1.35 lbs of IONLOCK™ Zinc in the base along with an Mn and Fe blend. RHTC contains two BIO-CAPSULES, the first includes industry-leading bio-fertility & N-fixing microbes and the second contains 6.25 oz of Terrasym®, a proven biostimulant that drives early root system development and season-long stress-mitigation benefits. The REVLINE HOPPER THROTTLE SOYBEAN (RHTS) base includes 0.43 lbs of IONLOCK™ Zinc combined with Mn and Fe. Two BIO-CAPSULES are charged with a proprietary 3-strain Bradyrhizobia inoculant, a third contains 5 oz of proven biostimulant Terrasym, and a fourth has bio-fertility & N-fixing microbes.	CORN: 50 units *one scoop (provided) per single row unit SOYBEANS: 40 units *one scoop (provided) per single row unit	2-pail case
 	UPSHIFT® C powered by ETHER™ UPSHIFT C powered by ETHER Enzyme Technology combines two enzymes specifically identified to increase phosphate availability, increase nutrient and water availability, boosting plant growth, while maximizing microbial activity.	2-15 lbs/acre	50 lb Bag

MULTIPLE HERBICIDE TOLERANCES EXCELLENT WEED CONTROL

ON-TARGET APPLICATIONS: | 90% less drift than traditional 2,4-D | 96% less volatile than 2,4-D ester

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use on Enlist® crops.

SOYBEANS	2,4-D choline	Glyphosate	Glufosinate
CORN	2,4-D choline	Glyphosate	Glufosinate FOP Herbicides

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance
- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with glyphosate, glufosinate and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

Seeds containing the PowerCore® Enlist®, PowerCore® Enlist® Refuge Advanced®, and Enlist® Corn – REFUGE traits are protected under one or more U.S. patents which can be found at: www.traitstewardship.com. The purchase of this traited seed includes a limited license to produce a single crop in the United States. The use of seed from such a crop and/or the progeny thereof for propagation or seed multiplication or for production or development of a hybrid or different variety of seed is strictly prohibited. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Corteva Agriscience Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements.

To plant PowerCore Enlist, PowerCore Enlist Refuge Advanced, and Enlist Corn – REFUGE seed, you must have a limited license from Corteva Agriscience (or other appropriate affiliates). In consideration of the foregoing, Corteva Agriscience grants to the Grower a limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed.

IRM – Properly managing trait technology is key to preserving it as a long term crop protection tool. Growers who fail to comply with IRM requirements risk losing access to this product. To help preserve the effectiveness of B.t. corn technologies, growers planting B.t. corn technologies are required to follow an IRM Plan. Consult the Corn Product Use Guide for appropriate refuge configuration options. Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Technology Use Agreement and Product Use Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements. For complete details on IRM requirements for hybrids with Bt technology, including refuge examples and important information on the use of insecticides on refuge and Bt corn acres, please consult appropriate Product Use Guide. Go to www.traitstewardship.com to download the latest Corteva Agriscience Corn Product Use Guide.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Corteva Agriscience technologies can be found at www.traitstewardship.com.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS Product Launch Stewardship Guidance and in compliance with the Corteva Agriscience policies regarding stewardship of those products. In line with these guidelines, Corteva Agriscience's product launch process for responsible launches of new products includes a long-standing process to evaluate export market information, value chain consultations, and regulatory functionality. Growers and end-users must take all steps within their control to follow appropriate stewardship requirements and confirm their buyer's acceptance of the grain or other material being purchased. For more detailed information on the status of a trait or stack, please visit www.biotradestatus.com.

Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are authorized for preemergence and postemergence use with Enlist® crops. Enlist Duo and Enlist One herbicides are not registered for use or sale in all states and counties; are not registered in AK, CA, CT, HI, ID, MA, ME, MT, NH, NV, OR, RI, UT, VT, WA and WY. Contact your state pesticide regulatory agency if you have questions about the registration status of Enlist® herbicides in your area. ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USE IN THE STATE AND COUNTY OF APPLICATION. USE OF PESTICIDE PRODUCTS, INCLUDING, WITHOUT LIMITATION, 2,4-D-CONTAINING PRODUCTS NOT AUTHORIZED FOR USE WITH ENLIST CROPS, MAY RESULT IN OFF-TARGET DAMAGE TO SENSITIVE CROPS/AREAS AND/OR SUSCEPTIBLE PLANTS. Additional product-specific stewardship requirements for Enlist crops, including the Enlist Product Use Guide, can be found at www.traitstewardship.com.

POWERCORE® is a registered trademark of Bayer Group. POWERCORE® multi-event technology developed by Corteva Agriscience and Bayer Group. Liberty®, LibertyLink® and the Water Droplet Design are registered trademarks of BASF. ®Roundup and Roundup Ready are registered trademarks of Bayer Group. Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. B.t. products may not yet be registered in all states. Check with your seed representative for the registration status in your state. The transgenic soybean event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C.

LibertyLink® Patent Statement

Seeds containing the LibertyLink® trait may be protected under one or more US patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a Bayer Grower Technology Agreement. It is illegal to save seeds containing the LibertyLink® trait for use as planting seed or for transfer to others for use as a planting seed.

Trademark Statement ©2018 Bayer CropScience LP, 2 TW Alexander Drive, Research Triangle Park, NC 27709. Always read and follow label instructions. Bayer, the Bayer Cross, ILeVO, InVigor, Liberty, LibertyLink, Poncho, VOTiVO, and the Water Droplet Design are registered trademarks of Bayer. Not all products are registered for use in all states. FOR SALE AND PLANTING IN THE U.S. ONLY.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium based herbicides.

Agrisure®, Agrisure® Above, Agrisure Viptera®, DuracadeViptera™, Viptera®Z3, Duracade®, Viptera®, and E-Z Refuge® are registered trademarks of a Syngenta Group Company. More information about Syngenta corn products is available at <http://www.biotradestatus.com/>.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience LLC. HERCULEX® and the HERCULEX Shield are trademarks of Corteva Agriscience LLC.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF.

Due to the unique cropping practices do not plant Roundup Ready® Alfalfa in Imperial County, California, pending import approvals and until Forage Genetics International, LLC (FGI) grants express permission for such planting. IN THE FOLLOWING STATES, PURCHASE AND USE OF HARVXTRA® ALFALFA WITH ROUNDUP READY® TECHNOLOGY IS SUBJECT TO A SEED AND FEED USE AGREEMENT, REQUIRING THAT PRODUCTS OF THIS TECHNOLOGY CAN ONLY BE USED ON FARM OR OTHERWISE BE USED IN THE UNITED STATES: ARIZONA, CALIFORNIA, COLORADO, IDAHO, MONTANA, NEVADA, NEW MEXICO, OREGON, UTAH, WASHINGTON AND WYOMING (THE "WESTERN STATES"). IN ADDITION, DUE TO THE UNIQUE CROPPING PRACTICES DO NOT PLANT ROUNDUP READY® ALFALFA OR HARVXTRA® ALFALFA WITH ROUNDUP READY® TECHNOLOGY IN IMPERIAL COUNTY, CALIFORNIA, PENDING IMPORT APPROVALS AND UNTIL FORAGE GENETICS INTERNATIONAL, LLC (FGI) GRANTS EXPRESS PERMISSION FOR SUCH PLANTING.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. HarvXtra® Alfalfa with Roundup Ready® Technology has pending import approvals. GROWERS IN THE WESTERN STATES MUST DIRECT ANY PRODUCT PRODUCED FROM HARVXTRA® ALFALFA WITH ROUNDUP READY® TECHNOLOGY SEED OR CROPS (INCLUDING HAY AND HAY PRODUCTS) ONLY TO UNITED STATES DOMESTIC USE.

Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Roundup Ready® is registered trademarks of Bayer Group, used under license by Forage Genetics International, LLC. HarvXtra® is a registered trademark of Forage Genetics International, LLC. HarvXtra® Alfalfa with Roundup Ready® Technology is enabled with Technology from The Samuel Roberts Noble Foundation, Inc.
